

KIMURA P5 MULTI-FUNCTIONAL COOLING / CHARGING STAND

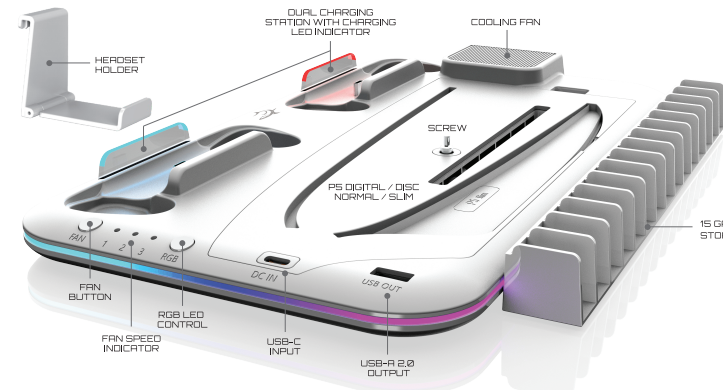

User manual - EN

Production Introduction:

This cooling base not only charges the P-5 controller but also effectively reduces the temperature of the P-5 console, enhances console performance, and reduces power consumption. This P5 stand is compatible with both the P5 disc version and the digital version. The product features a fan control switch with a smart chip. With a light press of the switch, the fan rotates sequentially through three different speeds. Each short press of the switch allows you to switch the fan speed or turn off the fan (strong, medium, and normal). The smart chip also has a power-off memory function. It remembers the fan's operating state before a power outage and maintains that state when the power is restored. It comes with a TYPE C-C charging cable that can power it through the Type-C port on the front of the P5 console. The charging indicator shows red when charging, remains off in standby mode, and stays blue when fully charged, turning off after 10 minutes. This product can switch between various RGB lighting modes or turn off the lights by long-pressing the power button for 3 seconds. It also includes a game disc storage bracket that can store up to 15 game discs and a headphone hook for storing headphones.

KIMURA P5 MULTI-FUNCTIONAL COOLING / CHARGING STAND

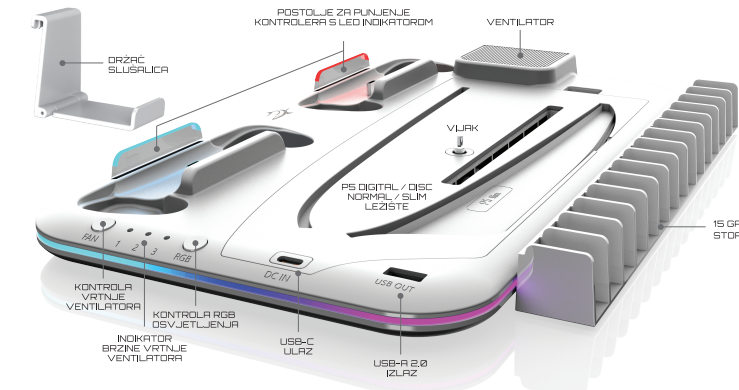

UPUTE

O proizvodu

Ovaj stalak za hlađenje ne samo da puni P5 kontrolere, već i učinkovito smanjuje temperaturu P5 konzole, poboljšava performanse konzole i smanjuje potrošnju energije. KIMURA-2 stalak kompatibilan je i sa starijom verzijom P5 konzole kao i sa slim verzijom disc/digitalnom verzijom. Proizvod ima prekidač za kontrolu brzine ventilatora. Laganim pritiskom na prekidač, možete odabrati jednu od tri brzine vrtnje. Svaki kratki pritisak na prekidač omogućuje promjenu brzine ventilatora ili gašenje ventilatora (brzo, srednje i sporo). Pametni čip također ima funkciju memorije za isključivanje. Pamti radno stanje ventilatora prije nestanka struje i održava to stanje kada se napajanje vrati. Dolazi s Type C - Type C kabelom za punjenje koji ga može napajati kroz Type-C priključak na prednjoj strani P5 konzole. Indikator punjenja svijetli crveno tijekom punjenja, ostaje isključen u stanju pripravnosti i ostaje plav kad je potpuno napunjen, isključujući se nakon 10 minuta. Ovaj proizvod može mijenjati različite RGB načine osvjetljenja ili isključiti svjetla dugim pritiskom na tipku za uključivanje tijekom 3 sekunde. Također uključuje držač za pohranu diskova s igricama koji može pohraniti do 15 diskova s igricama i plastičnu kucicu kao držač za slušalice.

Specification:

1. Input voltage: DC 5V
2. Input current: 3A
3. Controller charging current: DC 5V 1A
4. Fan speed: speed 1: 4500 RPM, speed 2: 4700 RPM, speed 3: 5000 RPM
5. Charging time: 3-4 H
6. Size: 320X210X30mm
7. Material: ABS
8. Product accessories: 1x P5 Cooling Stand, 1x Headset Holder, 1x User Manual, 1x C to C Charging Cable, 1x P5 Digital/Disc Panel, 1x P5 Slim Panel
9. Weight: 560g

Attentions:

1. Please place the product on a horizontal platform and a well-ventilated place, and use the built-in USB cable of the product
2. This is the ventilation cooling product, please don't cover any side vent, don't put anything into ventilation hole (Specially metal), if not, the fan or bases circuit will damage, so the cooling stand will not work.
3. Please clean the P5 cooling stand by dry cloth. Don't use water or alcohol, they may cause product short-circuit. Please shut off the connection of P5 cooling stand and the host electrical power when you clean it.
4. Do not store or use this product in damp or high temperature environment.
5. If it is drenched, soaking in water or break, please stop using it. Please don't break down the P5 cooling stand by yourself.
6. Please keep children away from the P5 cooling stand.

Karakteristike

1. Ulazni napon: DC 5V
2. Ulazna struja: 3A
3. Struja punjenja kontrolera: DC 5V 1A
4. Brzina ventilatora: Brzina 1: 4500 RPM, Brzina 2: 4700 RPM, Brzina 3: 5000 RPM
5. Vrijeme punjenja: 3-4h
6. Veličina: 320X210X28mm
7. Materijal: ABS
8. Paket sadrži: 1x P5 stalak za hlađenje, 1x držač slušalica, 1x korisnički priručnik, 1x Type-C kabel za punjenje, 1x P5 digitalna/disk ploča, 1x P5 tanka ploča
9. Težina: 560 ±5g

Pažnja

1. Postavite proizvod na vodoravnu platformu i dobro prozračeno mjesto i koristite isporučeni USB Type-C kabel
2. Ovo je proizvod za ventilacijsko hlađenje, nemojte prekrivati nijedan bočni ventilacijski otvor, nemojte gurati ništa u ventilacijski otvor, u protivnom će se oštetiti ventilator ili postolje, pa postolje za hlađenje neće raditi.
3. Očistite postolje za hlađenje P5 suhom krpom. Nemojte koristiti vodu ili alkohol, oni mogu uzrokovati kratki spoj. Isključite priključak rashladnog stalka P5 i električno napajanje glavnog računala kada ga čistite.
4. Nemojte pohranjivati ili koristiti ovaj proizvod u vlažnom ili okruženju visoke temperature.
5. Ako se uređaj natopi vodom ili se slomi, prestanite ga koristiti. Nemojte sami rastavljati postolje za hlađenje.
6. Držite djecu podalje od rashladnog postolja.
